ABSTRACT

This cumulative index includes items that appeared in the quarterly journal, "Special Libraries," from the years 1981 through 1986. Listed in alphabetical order, entries include: (1) articles, indexed by each author, subject or subjects, and, if not redundant, title; (2) reviews, indexed by the author or authors and title of each item being reviewed, and also referenced under the name of the reviewer(s); (3) software reviews; (4) reports of Special Libraries Association (SLA) activities, as well as references to persons running for SLA offices and reports of annual SLA conferences; and (5) letters to the editor in response to articles, indexed with the article as well as under the name of the writer of the letter, and other letters, indexed by subject as well as under the name of the letter writer. Introduction

This is a cumulated index to the articles, book and software reviews, reports of Special Libraries Association (SLA) activities, and letters appearing in the quarterly journal *Special Libraries* for the years 1981 through 1986.

Articles are indexed by each author, subject, or subjects, and, if not redundant, title. Reviews are indexed by the author, or authors, and title of each item being reviewed. There is also a page reference to the review under the name of the reviewer, or reviewers. In addition, software reviews are listed under the subject heading **Software (reviews)**. Titles of items reviewed appear in italics. Reports of SLA activities will be found under one or more of the subheadings under the main heading **SLA (Special Libraries Association)**. References to persons running for SLA offices will be found under their name, which is listed as a subject heading in boldface. If that same person is also the author of an article, book, and/or review, there is an additional main entry under their name as an author, and these references are found there. Reports of the annual SLA conferences are indexed under the name of the city in which they took place, as well as under the subhead "Annual Conference" under **SLA (Special Libraries Association)**. Letters to the editor that are in response to an article are indexed with the article, as well as under the name of the writer of the letter. All other letters are indexed by subject, as well as under the name of the letter writer.

This index was prepared entirely with a microcomputer. The MACREX software program was used to create and sort the entries, and WordStar was used to edit the index. Typesetting codes for boldface and italics were embedded in the floppy disk prepared by the indexer.

Acknowledgments

The compiler would like to thank Nancy Mulvany, J. B. Post, Allen Glicksman, and Pam Nottage for their assistance in the preparation of this index.
